

## CBC Fall 2017 Meeting

### Integrated Regional Conservation and Development (IRCAD) Program

#### IRCAD Regional Conservation Assessment Worksheet

The IRCAD Program's goals are to promote the sustainable balance of regional development and conservation; and provide data and tools to implement this vision. We will present updates and examples of the Program's implementation; and seek your input on how to mainstream the application of Regional Conservation Assessments (RCA's) and the IRCAD program.

We have provided five (5) specific questions below to elicit your input. Feel free to use this worksheet to write down your ideas and comments on these or other questions you might have. Please share these thoughts during the discussion period that follows this session, and/or submit this worksheet to event staff.

**(Optional Contact Information. Please Print Clearly):**

**Full Name :**

---

**Contact Info (E-mail/Phone#):**

---

- 1. What is most useful about a standardized Regional Conservation Assessments process and the overall approach to IRCAD?**
- 2. What are the major impediments we need to address in order to implement Regional Conservation Assessments across California? Financial resources? Political will? Inter-agency coordination? Lack of Data? Other?**

**3. How would you improve on the RCA process?**

**4. How can your organization help to mainstream the development and use of RCAs and the overall IRCAD process?**

**5. What is needed to secure the involvement of your organization in this effort?**

**Other Comments or Questions?**

*Feel free to submit this worksheet to an Event Staff Person or  
IAT Chair Don Yasuda ([dyasuda@fs.fed.us](mailto:dyasuda@fs.fed.us)).  
Thank you very much!*
